

# Progressing the Pan-Canadian Trust Framework (PCTF)

## Accelerating Canadian Digital ID

Since 2016, the Digital ID & Authentication Council of Canada's (DIACC) Trust Framework Expert Committee (TFEC) has been developing the **Pan-Canadian Trust Framework™ (PCTF)**.

The TFEC is comprised of representatives from the public and private sectors who identify and develops Canadian principled digital ID industry standards and supporting materials to secure identity service and solution interoperability.

**7** Draft Recommendations released for public review and comment as of March 2020:

**3** Draft Recommendations scheduled for public review and comment:

- Credentials** (Relationships & Attributes)
- Infrastructure** (Technology & Operations)
- Assessment** (Certification Scheme)

## PCTF MVP Components

The PCTF MVP will consist of six components as **Final Recommendations V1.0**, including:

## PCTF MVP Component Milestones

## One Framework, Many Partners

Comments were received from a broad and diverse group of individuals and organizations, both nationally and internationally, including:

- Global involvement includes:**
- Canada
  - US
  - European Union
  - Japan
  - UK
